Prof. Joshua Lederberg

Dear Professor,

I read the article in last Sunday's "Times", about your thrilling and exciting experimenting in genetics, and am hopeful that you may have some exciting news for a cure for stroke victims.

I had a stroke on June 3, 1964 and I get around with the help of a leg brace, but don't have too much use from my right hand.

I know how busy you must be, but I would appreciate it if you would write to me, and tell me if you have done any experiments in stroke, or if any of your friends or acquaintances, here in the East have. The reason I question this is, that I would be happy to let you or them experiment on me.

Hoping that you will be good enough to answer this letter,

(over)

I am sincerely
grateful
Jack Marcus
